PROJECTS

Cybersecurity Projects – Systems and Network Security, Penetration Testing, and Security Operations

Source: <https://github.com/Oluwaseunao/Cybersecurity-Projects>

Platforms and Technology Used: Tenable.io, GVM Greenbone, PFSense, Fortigate, EDR, IDS, IPS, Suricata, Wazuh, etc.

DevOps Projects - CI/CD pipelines, containerization, and cloud deployments

Source: <https://github.com/Oluwaseunao/DevOps-Projects>

Platforms and Technology Used: Terraform, Ansible, Jenkins, GitHub Actions, Docker and Kubernetes, AWS, Azure, GCP, Prometheus, Grafana, ELK, etc.

EXPERIENCE

Company: Wichtech Group December, 2022 - Present

Title: IT Administrator and Leads Manager

- Administered and maintained four corporate websites, ensuring uptime, security, content accuracy, and integration with marketing and sales workflows.
- Managed the Enterprise Resource Planning (ERP) system, overseeing configuration, user permissions, data integrity, and process optimization to support business operations.
- Led end-to-end project management for the deployment of new IT systems, from requirements gathering to implementation, testing, and go-live.
- Configured newly procured systems with secure, optimized settings aligned with organizational policies and compliance standards.
- Delivered IT support and hands-on training for staff post-onboarding, ensuring smooth adoption of newly deployed systems and minimizing operational downtime.
- Managed lead generation and CRM workflows, ensuring accurate tracking, follow-up, and conversion of prospects into clients.
- Oversaw inventory management processes, maintaining accurate stock levels and seamless ERP synchronization.
- Directed social media management activities, creating and scheduling content to strengthen brand visibility and engagement.
- Acted as first responder to IT disruptions, primarily software-related, diagnosing issues, implementing solutions, and restoring services rapidly.
- Maintained strong relationships with third-party IT vendors, ensuring service quality, timely escalations, and alignment with business needs.

Company: Ehizua Hub, Lagos August, 2022 - Present

Title: Cyber Security Instructor

- Delivered training on diverse cybersecurity and networking concepts, ensuring learners gain both theoretical understanding and practical application skills.
- Designed and curated tailored course content to address specific knowledge gaps and skill development needs of trainees.
- Guided students in creating and configuring virtual labs, including networking, troubleshooting, and maintaining virtual machines such as Windows Server 2022, Windows 10/11, pfSense, Kali Linux, Metasploitable, and Android.

- Assisted and guided learners in installing and configuring cybersecurity tools and lab programs, including Splunk, Wazuh, GVM Greenbone, Tenable.io, and other industry-standard solutions.
- Developed hands-on projects to reinforce and consolidate key concepts learned during training sessions.
- Conducted dedicated “blocker sessions” to clarify misconceptions, resolve learner challenges, and ensure learning continuity.
- Performed ongoing performance evaluations to assess learner progress, identify areas for improvement, and adjust teaching strategies for optimal outcomes.

Company: Attwoll College, Lagos
Title: Coding and ICT Instructor

September 2021 - August 2022

- Managed the ICT laboratories, overseeing the operation and maintenance of 30 desktop computers, 10 laptops, and an electronic board (E-board).
- Designed and implemented lesson plans that supported students in achieving both academic requirements and practical IT skill development.
- Trained students in programming languages and tools, including HTML, CSS, JavaScript, Python, and Scratch, fostering creativity and problem-solving skills.
- Provided on-demand IT support to colleagues, ensuring smooth integration of technology into teaching activities.
- Coordinated the setup, cabling, and configuration of ICT equipment for school programs and events.
- Collaborated with third-party vendors to maintain a stable and secure network environment for the school.
- Prepared students for internal and external examinations in Data Processing and Computer Studies, ensuring curriculum alignment and readiness for assessments.

ADDITIONAL SKILLS AND TECHNOLOGIES

Endpoint Detection and Response, CVE/CWE Management, CVSS Scoring, OWASP Top 10, Risk Prioritization, Vulnerability Remediation, PowerShell Scripting, BASH Scripting, Firewall/NSG Configuration, NIST 800-37: Risk Management Framework, NIST 800-53: Security and Privacy Controls, NIST 800-61: Computer Security Incident Handling Guide, NIST 800-40: Guide to Enterprise Patch Management Planning, NIST Cybersecurity Framework, PCI-DSS, GDPR, HIPAA
